

INDUSTRIAL

Gear Oil Range

The Rock Oil range of advanced heavy duty mineral and synthetic industrial gear oils offering outstanding lubrication performance under severe operating conditions. This includes improved energy efficiency, long service life and high resistance to micro-pitting for optimal gear protection. Products in this range are suitable for all enclosed industrial reduction gear systems operating under severe conditions (e.g. wind turbines etc), plain / rolling element bearings and oil circulation systems.

OM INDUSTRIAL
GEAR OIL

ISO VG: 68, 100, 150, 220, 320, 460, 680

OM Industrial Gear Oils are manufactured from a combination of mineral base stocks fortified with state of the art sulphur phosphorous additives to produce an oil suitable for most industrial applications, giving extreme pressure and anti-wear protection.

- PN 06130: OM68
- PN 06032: OM100
- PN 06044: OM150
- PN 06140: OM220
- PN 06150: OM320
- PN 06051: OM460
- PN 06160: OM680

DIN 51517 PART 3 • AGMA 9005-D94 • US STEEL 224 • DAVID BROWN S1.53.101 (E)

PAG INDUSTRIAL
GEAR OIL

ISO VG: 150, 220, 320, 460

PAG Synthetic Gear Lubricants are a range of Polyalkylene Glycol base synthetic fluids, which provide outstanding load carrying properties and excellent thermal stability.

- PN 14220: PAG150
- PN 14230: PAG220
- PN 14530: PAG320
- PN 14540: PAG460

PAG SYNTHETIC GEAR OIL

SYNGEAR CLP
INDUSTRIAL GEAR OIL

ISO VG: 32, 46, 68, 100, 150, 220, 320, 460, 680

Advanced synthetic heavy duty industrial gears oils offering outstanding lubrication performance under severe operating conditions. This includes improved energy efficiency, long service life and high resistance to micro-pitting for optimal gear protection.

- PN 06541: CLP32
- PN 06740: CLP46
- PN 06720: CLP68
- PN 06760: CLP100
- PN 06511: CLP150
- PN 06201: CLP220
